

# Euro Wall Spot

Cat. No. EWS

Cat. No. EWS/R

The Euro Wall Spot is for situations where the luminaire needs to be discreet. The smaller sized MR11 lamp is utilised to achieve this. The spotlight can be aimed in any direction. This luminaire has a fully adjustable arm allowing 360 degree rotation and 0 - 90 degree elevation with a built-in glare guard. The Euro Wall Spot has been designed to be mounted on walls and provide directional light for pathways and structural elements of a building.

The Retro™ is a 110/240-12 ac mains option suited to an installation where mounting a transformer is a problem, e.g. a brick wall where there is only the cable protruding out of the wall and it is not an option to recess the transformer or when replacing an existing light fitting. The base size increases in size to accommodate the encapsulated IP66 dimmable transformer.
