

Inground 1-11

12 volt

Cat. No. IG1-11(12)

The Inground 1-11 12 volt is suitable for use with 50 or 75 watt halogen and 60 watt IRC lamps, which have a range of beam angles from 8 to 45 degrees. The AR1-11 lamp has very low glare output due to the dome covering the halogen capsule. The luminaire can be driven over at 10km/h max (6mph) with a maximum vehicle weight of 1500kg (3000lbs) or walked upon without being damaged. The fixture also has a 'Flush Fit' lens which stops water pooling and depositing dirt on the lens.

The Inground 1-11 12 volt is supplied with a mounting canister. The lamp can be directed (up to 20 degrees) without the need to remove the fitting from the canister due to the vandal-resistant four allen head screw fixing system which attaches the flange to the body of the luminaire.
